## Contents

<b>Acknowledgments</b>	10
<b>Preface and Overview</b>	11
<b>Historical Introduction</b>	18
The Body-mind Dualism from Classics to the Days of Psychosomatic Medicine.....	18
The irrational part of the psyche.....	22
Anger now and then.....	22
Cognitive evaluations processes or Appraisals .....	24
Reason versus passion.....	24

### ***PART 1. Encountering the Demands of Life:***

#### Approaches to Personality, Stress, Health, and Psychological Well-Being.

Foreword to Part One	33
<b>1. Approaches to Personality and Stress</b>	<b>35</b>
Trait-oriented Approaches to Personality.....	37
Encountering the Demands of Life.....	39
<i>The conceptualization and measurement of stress</i> .....	40
Cognitive-Mediational Theory.....	42
Process-Oriented and Trait-Oriented Approaches: <i>A controversy</i> .....	43
Different Coping Strategies, Individual Resources, and Social Support.....	46
Social support.....	51
<i>In conclusion</i> .....	52
<b>2. Dimensions of Health and Personal Growth (A).</b>	<b>55</b>
Relationships between Dimensions of Health.....	56
<i>Illusions and mental health: A controversy</i> .....	57
The Dimensions of Psychological Well-Being; (A), (B), and (C).....	59
Personal Growth Perspectives (A).....	61
<i>The self-actualizing person</i> .....	62
<i>Personal growth perspective and empirical research</i> .....	63
<i>Measurements of the personal growth dimension analyzed</i> .....	64
Spirituality and Religion as Means of Personal Growth.....	66
<i>In conclusion</i> .....	69

3.	Subjective Well-being Perspectives (B.)	71
	The Levels of Subjective Well-Being.....	72
	The Difference between Moods and Emotions.....	73
	Subjective Well-Being Measured in the Terms of Positive and Negative Affect.....	74
	Relationships between Traits and Mood Measures.....	75
	Subjective Well-Being Measured in Terms of Personal Goals and Strivings	78
	Additional Concepts.....	80
	<i>Optimism</i> .....	80
	<i>Hope</i> .....	82
	<i>Explanatory Style</i> .....	84
	<i>In conclusion</i> .....	85
4.	Stress-resistant Personality Perspectives (C).	87
	Conceptualization of "Sense of Coherence" and "Hardiness" and Some Related Concepts.....	88
	Research and Some Methodological Concerns on SOC and Hardiness.....	91
	SOC' and Hardiness' Relatedness to Trait-Measures.....	94
	<i>Some more comments on SOC and Hardiness</i> .....	96
	Additional Notions; the CEST.....	97
	Conceptual Circularity in Health Research.....	98
	<i>In conclusion</i> .....	100
5.	Perspectives on Psychological Well-Being Summarized	101
	Adding comments on beliefs and trust	
	Summarizing and Juxtaposing the Dimensions of Well-Being.....	103
	<i>The confounding role of affect: <u>Moods</u></i> .....	105
	<i>Well-being measures relatedness to traits</i> .....	106
	<i>Some multifaceted approaches</i> .....	106
	Foundations of Faith and Interpersonal Trust.....	107
	<i>Beliefs according to the CEST</i> .....	109
	<i>Faith and trust in fellow humans</i> .....	110
	Approaches to Interpersonal Trust.....	111
	Faith and spirituality.....	115
	Concluding remarks on Part One:	
	Limitations and Future Directions.....	116
	<i>In conclusion</i> .....	120
	Addition	120

## **PART 2. Responding to the Demands of Life:**

### Concepts, Controversies, and Physiological Correlates.

Foreword to Part Two	122
6. Cognition and Emotion; A Controversy	125
Historical Introduction.....	126
The Question of Primacy of Either Cognition or Emotion.....	127
<i>Appraisals versus knowledge in emotion generating.....</i>	128
<i>The motivational-transactional-relational theory vs. other approaches</i>	129
Other Controversial Issues within the Cognition – Emotion Controversy..	131
<i>Can emotions be unconscious?.....</i>	133
Universalist versus Constructivist Positions.....	135
<i>Anchor points in neuroscience.....</i>	136
<i>Other notions of appraisals emotion generating and concluding remarks.....</i>	137
<i>In conclusion.....</i>	139
7. Inhibition and Ego-Defenses	141
Inhibition – General Discussion.....	141
Ego-Defenses.....	143
The Defense Mechanisms of Repression and Denial.....	144
<i>"Repressor style" and "repressive coping style".....</i>	146
<i>"Forgetting repression and adopting repressive coping style".....</i>	147
Alexithymia.....	150
<i>Alexithymics and "repressors": Differences in physiological reactivity....</i>	152
<i>In conclusion.....</i>	153
8. Affect-Regulation, Self-Regulation, and Temperament	155
The Umbrella Concept of Self-Regulation.....	156
<i>The impact of the psychoanalytic point of view on the conceptualizations of the self</i>	157
Main Lines of Research on Affect-Regulation and Self-regulation.....	158
Temperament, Affect-Regulation and Self-Regulation.....	163
<i>Temperamental differences and Arousal:</i>	
Extraversion, introversion, and neuroticism.....	164
Self-representations, self-complexity and affect-regulation.....	167
<i>In conclusion.....</i>	168

9. Physiological Measures and Emotional Response Patterns	171
Psychophysiology and the Nervous System.....	172
<i>The fundamental constituents and processes of the nervous system.....</i>	172
<i>Psychophysiological measurement strategies and arousal.....</i>	177
Emotional Experience and Expressiveness.....	181
<i>Affect Intensity and Arousal.....</i>	182
Juxtaposing Personality Traits and Other Response Patterns.....	183
Some Conceptualizations of Emotional Response Patterns Involving Inhibition	185
<i>Physiological correlates of emotional suppression.....</i>	187
<i>Conflict and ambivalence over emotional expression.....</i>	188
<i>Emotional control and some trait-dimensions.....</i>	189
<i>In conclusion.....</i>	190
10. Controversial Issues and Methodological Concerns	193
The Determinants of Behavior.....	193
<i>Summarizing Chapters Seven, Eight, and Nine.....</i>	194
<i>Comments on inhibition and basal levels of arousal.....</i>	196
<i>Further comments on problems of conceptual nature.....</i>	197
Methodological Problems: Confounding and Intervening variables.....	199
General Measurement Issues in Psychological Research.....	200
<i>Negative Affect and Neuroticism as nuisance factors.....</i>	202
<i>Problems associated with interviews.....</i>	204
<i>Projective tests.....</i>	204
<i>Psychophysiological Experimental Procedures.....</i>	205
How then, is health or ill health measured?.....	206
<i>Meta-analysis.....</i>	208
<i>In conclusion.....</i>	208

### **PART 3. *Affected by the Demands of Life:***

#### Psychosocial variables in Research on Susceptibility to Disease.

Foreword to Part Three	211
11. Stress, Emotion and Susceptibility to Disease	213
Psychological Factors and Psychosomatic Diseases.....	214
<i>Mechanisms underlying psychosocial variables' relationship to health.</i>	215
<i>Links between personality and disease: the Friedman &amp; Booth-</i>	
<i>Kewley meta-analysis.....</i>	216

The Multilevel Constructs of Type A Behavior Pattern and Power Motivation.....	218
Emotions and Health.....	222
The Levels of Aggression and Anger.....	223
<i>Anger, hostility, arousal and health outcomes</i> .....	226
<i>Personality traits and hostility</i> .....	228
<i>In conclusion</i> .....	229
12. Physiological Correlates of Stress and Emotion	232
The Levels of Study.....	234
The Research Field of "Psychoneuroendocrinology".....	234
Hormones.....	237
<i>The mediating role of the hormones</i> .....	240
Psychoneuroimmunology and the Immune System.....	243
The Main Processes and Constituents of the IS in focus.....	244
<i>Examples of measurements of the immune functions</i> .....	249
<i>In conclusion</i> .....	254
13. The concept of Control and Concluding Remarks	255
The Philosophical Roots of Mental Control.....	256
Dimensions of Control and the Concepts Reviewed.....	259
<i>Unstable vs. stable appraisals, response patterns, and perceptions</i> <i>of control vs. needs for control</i> .....	262
Faith in One's Abilities, Sense of Personal Mastery, and the Concept of Control.....	268
The Concept of Control and Health Outcomes.....	271
<i>Need for control and need for power</i> .....	272
<i>The concept of control and physiological changes</i> .....	273
<i>Control, chronic illness, and disability</i> .....	274
Limitations.....	277
<i>In conclusion: Summarizing Psychological and Psychosocial</i> <i>Variables Influence on Well-being and Health Outcomes</i> .....	278
<b>Afterword.</b> Outlining Faith – Abilities in the context of passions or Psychic Energy....	280
Further Comments on the Foundations of Faith – Abilities.....	283
<i>In conclusion</i> .....	284
<i>Faith – Abilities and passions</i> .....	285
<b>References</b> .....	288
